**WHA Resolution 67.20**

Regulatory system strengthening for medical products

Recognizing that effective regulatory systems are an essential component of health system strengthening and contribute to better public health outcomes, that regulators are an essential part of the health workforce, and that inefficient regulatory systems themselves can be a barrier to access to safe, effective and quality medical products;

Medical devices @MedicalDevicesG - 11 mag
Using clinical data in health technology management

#DocBox
@mustafasuleymn any plans on @DeepMindAI as freeware like Android

A fantastic 5 member panel session on #DeepMachine Learning for preclinical diseases
WHO Model Regulatory Framework

- Basic level controls and enforcement
  - Legal framework
  - Market oversight
  - Reporting system

- Expanded level controls and enforcement
  - Regulatory controls, depending on the priorities of the country

3rd Global Forum on Medical Devices 10-12 May 2017

Main features of the new texts (2)

- Improved transparency through the establishment of a comprehensive EU database of medical devices and of a device traceability system, allowing to trace the device from the manufacturer through the supply chain to the final user.
- Improved coordination between Member States in the fields of vigilance and market surveillance.
- Role and responsibilities of economic operators. Certain new obligations for authorised representatives.
New regulations for #medicaldevice in EU #3gfmd #MedicalDevicesG

Revision of the EU Medical Devices Legislation - Background

- Directive 90/385/EEC on active implantable medical devices
- Directive 93/42/EEC on medical devices
- Regulation on medical devices
- Directive 98/79/EC on in vitro diagnostic medical devices
- Regulation on in vitro diagnostic medical devices
